

CHAPTER

3

Twin Engines: Tainan's Green Energy Hub and Science Park Clusters

To respond to the dawning era of the green economy, major countries worldwide are actively developing renewable energy sources, and the green energy industry has become a bright light of the global economy. Shalun Smart Green Energy Science City was conceived with the aim of creating a kind of green Silicon Valley in Taiwan, enabling the green energy industry to take root in Tainan, and in conjunction with the Southern Taiwan Science Park, which houses Taiwan's highest concentration of green buildings, serving as a dual-engine core to drive satellite factory investment in Tainan.
